About Gilead Sciences
Gilead Sciences, Inc. is a research-based biopharmaceutical company that discovers, develops and commercializes innovative medicines in areas of unmet medical need. The company strives to transform and simplify care for people with life-threatening illnesses around the world. Gilead has operations in more than 35 countries worldwide, with headquarters in Foster City, California.

Gilead Sciences has pursued – and achieved – breakthroughs once thought impossible in medicine for more than three decades, with the goal of creating a healthier world for all people.

At Gilead, we have pioneered more than 25 medicines since our founding in 1987 and have an expanding portfolio of investigational compounds. We have helped transform care for people living with HIV, developing the world’s first HIV single tablet regimen to treat the disease and the first medicines to prevent infection with the HIV virus. Our scientists are continuing to pursue new kinds of treatment, such as long-acting antivirals, and the ultimate goal: a cure. Building on our success in HIV, we applied the same tenacity to hepatitis C virus (HCV), delivering four curative treatments in less than four years. Today, more than 4 million people have been prescribed our HCV therapies.

Advancing Global Health
Gilead recognizes that advancing scientific discovery is only one aspect of improving public health – it takes more than medicine to tackle the challenges people and communities face. We are committed to going beyond the science to address social and structural challenges. We collaborate with partners around the world to bring our medicines to an estimated 14+ million people in 140 low- and middle-income countries.

Our Therapeutic Areas
HIV, Liver & Fibrosis, Inflammatory Diseases, Oncology

Saving Lives
Millions of people around the world are living healthier lives because of innovative therapies developed by Gilead

Giving Back
Recognized as the top corporate philanthropic HIV/AIDS donor by Funders Concerned About AIDS for five consecutive years
2021-2022 Fellowship Information

Medical Information Fellowship
One Position Available
July 1, 2021 – June 30, 2022
Experiential Highlights
- Write, update and review Medical Information content in response to unsolicited requests for Gilead products
- Establish a relationship with the Gilead Medical Resource Center by responding to medical information escalations
- Collaborate with the Medical Communication and Operations team on process improvement initiatives, implementation of new technology, and ensuring inspection readiness
- Collaborate with and support Medical Affairs by providing drug information expertise
- Rotate with another external department
- Participate in mentorship with Fellowship preceptor and other pharmacy students

Medical Affairs Fellowship
One Position Available
July 1, 2021 – June 30, 2022
Experiential Highlights
- Create, update and review reactive Medical Affairs content
- Understand the role of Medical Affairs in post-market medical education and data generation
- Establish relationships with cross-functional partners (e.g., marketing, clinical research, medical information) to help drive Medical Strategy
- Understand the role of Medical Scientists in delivery of reactive medical communications
- Develop a deep understanding of the regulations and guidance from national and global regulatory agencies that govern the pharmaceutical industry
- Rotate with another external department
- Participate in mentorship with Fellowship preceptor and other pharmacy students

Application Process
To apply for the fellowships, you must:
- Submit your CV and letter of intent to request an interview via the Personnel Placement Service (PPS)
  - Explain your interest in the fellowship and how it will help you prepare for a career in the pharmaceutical industry
- Participate in PPS interviews at the virtual ASHP 2020 Midyear Clinical Meeting December 6 – 10
- Complete your USC application and submit all application materials – details to come
- Candidates may apply to both fellowships, however, must submit separate applications

Application Requirements:
A PharmD, MD, PhD or equivalent advanced degree from an accredited college or university within five years of initial appointment
