 - UC Irvine Senior Health Center
 - USC Verdugo Hills Professional Pharmacy

USC School of Pharmacy

Purpose:

To build upon the Doctor of Pharmacy (PharmD) education and outcomes to develop community-based pharmacist practitioners with diverse patient care, leadership, and education skills who are eligible to pursue advanced training opportunities including postgraduate year two (PGY2) residencies and professional certifications.

Program Description:

The PGY1 CPRP at the USC School of Pharmacy was established in 1999. It is one of the oldest and largest accredited community-based pharmacy residency programs in the nation. Our program balances experiences in traditional ambulatory care, pharmacy operations, teaching, project management, and pharmacy administration. We offer unique perspectives on the practice of pharmacy and emphasize areas such as clinical practice, teaching, research and project management, collaborative practice development, entrepreneurship, leadership, and community service. The mission is to develop community-based pharmacy practitioners and advanced practice pharmacists who are educators, scholars, skilled patient care providers improving the health of patients, and leaders in advancing the practice of pharmacy in the communities that they serve wherever health and medication needs arise.

“The USC CPRP gave me the best training I could have asked for as a new pharmacist. I felt well prepared and confident to enter any community and ambulatory care setting. There is a wide variety of experiences that help residents become well rounded in both clinical and non-clinical aspects of pharmacy.”

- Michelle Hormozian
